## Work Experience

#### The Boring Studio

December 2023 - February 2024

FullStack Development Intern | Link

Remote

- Lead the development of Heyoo Mobile Application. Implemented a robust JWT authentication system, deeplinking system using GoRouter and error handling in Flutter.
- Created a scalable architecture in the Frontend by utilizing Flutter Hive to store chat data locally, thereby enhancing the chatting process with improved intuitiveness and speed.
- In Backend, employed Socket.io server, Redis, and Kafka to implement scalable chatting for multiple users simultaneously.

#### Godrej Industries Limited

December 2022 - March 2023

Mobile Application Development Intern | Link

Mumbai, Maharashtra

- Demonstrated proficiency in the development of a mobile application's home screen widget, alongside with the execution of vital background tasks to bolster application performance.
- Adeptly translated Figma design elements into Flutter code, and implemented the establishment of deep links to
  optimize internal application functionality.
- Utilized the Jira tool to effectively manage project planning and monitor task progress. Orchestrated the Agile methodology throughout the development lifecycle, fostering a dynamic and collaborative work environment.

Website Angelsinn.in

August 2022

Freelance web developer | Link

Remote

- Effectively conceptualized, developed, and deployed a customized website, as per the specifications defined.
- Technologies used: HTML, CSS, JavaScript, Figma and PHP

## **Projects**

#### AI Trainer | Machine Learning, Python, MERN, Flask | GitHub

June 2023 - Current

- \* AI Trainer with Machine Learning and Flask is a web application focused on posture assessment and improvement.
- \* It combines React.js, Tailwind CSS, and JavaScript for the Frontend, while Flask and Node.js handle the Backend.
- \* Utilized mediapipe for pose estimation and pickle for model storage, I've integrated a diverse array of ML algorithms like Logistic Regression, Ridge Classifier, Random Forest Classifier, and Gradient Boosting Classifier to analyze user posture.

#### MUQA: Mumbai University Q&A | Node.js, Flutter, AWS | Link

November 2023 - December 2023

- \* Orchestrated the full-stack development of MUQA, a dynamic mobile application designed for Mumbai University students.
- \* Utilized Flutter for Frontend development, Node.js for Backend implementation, and AWS DynamoDB for database management. Orchestrated deployment on AWS EC2 to ensure high availability and reliability.
- \* MUQA facilitates efficient paper revisions by providing a user-friendly platform to access and review past years' question papers and solutions.

#### Dealership API | MongoDB, Express.js, React.js, Node.js | GitHub

May 2023

- \* Engineered a project with the aim of automating dealership operations, encompassing the sales process and the establishment of multiple deals across a wide range of vehicles.
- \* Integrated JWT authentication to ensure secure user and dealership interactions.
- \* This system empowers users to review available deals, make selections, and complete transactions. Users have access to an array of vehicles and can explore different dealerships presenting diverse inventories.

## Sell Easy | MongoDB, Express.js, Node.js, Bootstrap | GitHub | Link

July 2022 - Dec 2022

- \* Designed and developed an auction based e-commerce platform facilitating the purchase and sale of diverse products.
- \* The project encompasses a robust authentication system for both buyers and sellers.

# Android TV remote app | Android Native, Java | GitHub

June 2021 - Dec 2021

- \* Developed an Android application enabling users to seamlessly control a Smart TV through their mobile device.
- \* Implemented a robust back-end system to process user-inputted instructions, subsequently generating and transmitting the corresponding signal to the local TV unit.

#### Education

#### Mumbai University

## Technical Skills

Languages: Python, Java, C, C++, HTML/CSS, JavaScript, Typescript, SQL, DART(Flutter)

Developer Tools: VS Code, Android Studio, MongoDB, MySQL

Technologies/Frameworks: Node.js Express, React.js, GitHub, Flutter

Designing: Adobe (Photoshop, XD, Premiere Pro), Canva
